Dear Valued Customer:

Thank you for your interest in **Charter Industries**. We are committed to exceeding your expectations for service, quality, and value.

We added regional distribution facilities in New York, Florida, and California to serve you better than ever. We still have our central facility in Grand Rapids, Michigan.

We are proud of our 98% success rate of shipping stock products the same day for orders received before 5:00 PM EST. We frequently add new colors, sizes, species, and profiles to our stock inventory.

Please browse some available options in our catalog. You can also contact one of our experienced customer service representatives to assist you.

Thank you again for trusting us to supply the quality products you need with the unparalleled service you deserve.

Sincerely,
The Entire Staff of **Charter Industries**

TERMS & CONDITIONS OF SALE

Terms	Net 30 days with approval of credit application (see page 44). All others C.O.D. or credit card
Credit	Credit application available near the back of the catalog.
Shipping Date	All orders of stock inventory will ship same day if placed before 5:00 EST.
Shipping Charges	FOB our warehouse
Returns	Returns must be approved by Charter Industries. Returns due to mis-ordering by the customer are subject to a 15% restocking charge. All returns must be made within 30 days of receipt of order.
Warranties	Charter Industries guarantees products to be free from defects for one (1) year from date of initial delivery. This warranty does not apply to damages from shipping, storage, or misuse. Products altered in any way from their original condition are also not covered under this warranty.
Lead Time	Charter Industries fulfills and ships 98% of its orders from stock. If you order a non-stock item, we will contact you and give you the shortest lead-time possible, usually less than five days.

Disclaimer Charter's Refurbishing Supplies are compatible with products sold by Haworth®, Herman Miller®, Steelcase® and Westinghouse®, but are not authorized by and do not originate with any of the previously listed companies.

HOT MELT ADHESIVES

Charter Part #	Status	Packaging	Applications	Properties	Process Temp / Line Speed
FILLED CARTRIDGES 782.0.1026 White	Stock	34# Box	EVA Cartridges Cartridge hot melt for HOLZ-HERr type edgebanders. Suitable for HPL, solid wood, veneer and PVC	Medium viscosity high initial tack for high-speed edgebanding	Melt Pot Setting 200c-230c Speed: 12-25m/min
782.5.0026 Translucent-Natural 782.286.62 Brown	Stock	34# Box	EVA Cartridges Cartridge hot melt for HOLZ-HERr type edgebanders. Suitable for HPL, solid wood, veneer and PVC.	Medium viscosity high initial tack for high-speed edgebanding	Melt Pot Setting 180c-200c Speed: 12-25m/min
FILLED 774.4.2026 Natural equal Jowat® 288.70 774.4.1026 White equal Jowat® 288.71	Stock	55# Bag	Filled granulate for automatic edgebanding. suitable for solid wood, veneer, and PVC.	Medium viscosity high initial tack for high-speed edgebanding	Melt Pot Setting 180c-200c Speed: 12-40m/min
FILLED 779.6.2026 Natural equal Jowat® 288.90	Stock	55# Bag	Filled granulate for automatic edgebanding. suitable for solid wood, veneer, and PVC.	Medium viscosity high initial tack for high-speed edgebanding	Melt Pot Setting 190c-210c Speed: 18-60m/min
FILLED 788.3.2026 Natural equal Jowat® 282.20	Stock	55# Bag	Filled granulate for automatic edgebanding. Low Processing Temp suitable for solid wood, veneer, PVC. Also paper and melamine with manual edgebanding machines	Low processing temp. Very long open time, good cold resistance.	Melt Pot Setting 130c-160c Speed: 5-20m/min
FILLED CARTRIDGES 782.0.2026 Natural equal Jowat® 286.80 782.0.9926 Black equal Jowat® 286.83	Stock	34# Box	EVA Cartridges Cartridge hot melt for HOLZ-HERr type edgebanders. Suitable for HPL, solid wood, veneer and PVC.	Medium viscosity high initial tack for high-speed edgebanding	Melt Pot Setting 180c-200c Speed: 12-25m/min
CLEAR 773.1.0026 Unfilled equal Jowat® 281.48	Stock	55# Bag	Clear Granulate Hot Melt without fillers for an even stronger bond, minimal glue line, and higher yield. Suitable for HPL, solid wood, veneer and PVC.	Medium viscosity high initial tack for high-speed edgebanding	Melt Pot Setting 200c-230c Speed: 12-25m/min
Jowat® 280.10 Natural	Stock	44# Bag	Filled granulate for automatic edgebanding. suitable for solid wood, veneer, and PVC.	Medium viscosity high heat resistance and good cold flexibility. Excellent color and heat stability.	Melt Pot Setting 180c-200c Speed: 18-60m/min
Jowat® 280.30 Translucent Natural (not the same as clear)	Stock	44# Bag	Unfilled granulate for automatic edgebanding. Suitable for solid wood, veneer, and PVC.	Medium viscosity high initial tack for high-speed edgebanding	Melt Pot Setting 180c-200c Speed: 18-60m/min
Jowat® 288.48 Clear	Stock	44# Bag	Clear Granulate Hot melt without fillers for an even stronger bond, minimal glue line, and higher yield. Suitable for HPL, solid wood veneer and PVC.	High viscosity high initial tack for high-speed edgebanding	Melt Pot Setting 190c-210c Speed: 18-60m/min
Jowat® 282.20	Stock	44# Bag	Filled granulate for automatic edgebanding. Low Processing Temp. Suitable for solid wood, veneer, PVC. Also paper and melamine with manual edgebanding machines.	Low processing temp. Very long open time, good cold resistance	Melt Pot Setting 130c-150c Speed: 5-20m/min
Jowat® 286.80 Natural	Stock	35# Box	EVA Cartridges Cartridge hot melt for HOLZ-HERr type edgebanders. Suitable for HPL, solid wood, veneer and PVC.	Medium viscosity high initial tack for high-speed edgebanding	Melt Pot Setting 180c-200c Speed: 12-25m/min
Jowat® 286.82 Brown	Stock	34# Box	EVA Cartridges Cartridge hot melt for HOLZ-HERr type edgebanders. Suitable for HPL, solid wood, veneer and PVC.	Medium viscosity high initial tack for high-speed edgebanding	Melt Pot Setting 180c-200c Speed: 12-25m/min
Jowat® 288.90 Natural Jowat® 288.60 (Same as 288.90 except less filler. Best for HPL and ABS)	Stock	44# Bag	Filled granulate for automatic edgebanding. Suitable for solid wood, veneer, and PVC.	Medium viscosity high initial tack for high-speed edgebanding	Melt Pot Setting 190c-210c Speed: 18-60m/min

All Hot Melt is IN STOCK and available for same day shipping.

CUTS

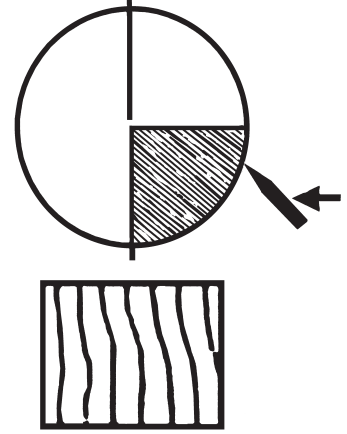

ROTARY

The log is mounted centrally in the lathe and turned against a razor sharp blade. Since this cut follows the log's annular growth rings, a bold variegated grain marking is produced.

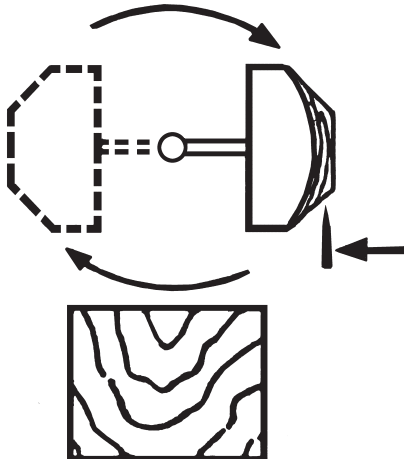

FLAT SLICING

The half log, or flitch, is mounted with the heart side flat against the guide plate of the slicer and the slicing is done parallel to a line through the center of the log. This produces a variegated figure.

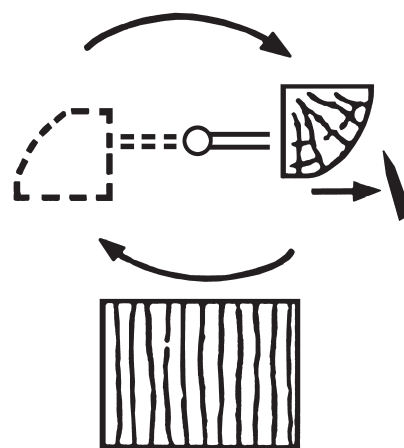

QUARTER SLICING

The quarter log, or flitch, is mounted on the guide plate so that the growth rings of the log strike the knife at approximately right angles, producing a series of stripes, straight in some woods, varied in others.

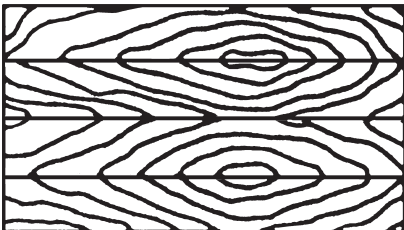

HALF-ROUND SLICING

A variation of rotary cutting in which segments, or flitches, of the log are mounted off center in the lathe. This results in a cut slightly across the annular growth rings.

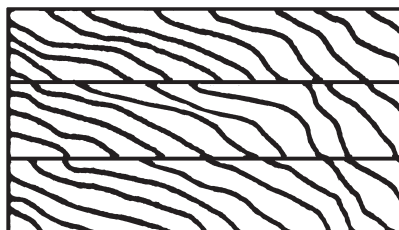

RIFT-CUT

Rift cut veneer is produced in the various species of Oak. Oak has medullary ray cells which radiate from the center of the log like the curved spokes of a wheel.

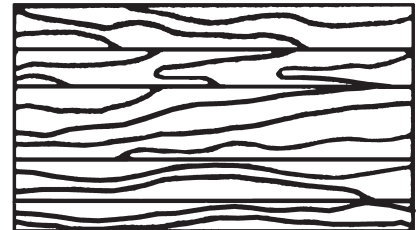

BOOK MATCHING

In book matching, every other sheet of veneer is turned over to achieve a continuous, flowing, balanced, pattern.

SLIP MATCHING

In slip matching, the sheets of veneers are joined side by side. The grain pattern is repeated from sheet to sheet.

RANDOM MATCHING

In random matching, veneers from several different logs and flitches are carefully selected and deliberately mismatched for the most desirable effect and appearance.

SUGGESTED VENEER FINISHING INSTRUCTIONS

Surface Preparation

The veneer should be clean, dry, and free of all foreign material such as oil, grease, wax, etc. Using extra-fine sandpaper, sand the entire area to a smooth, uniform surface. Dust or vacuum the surface clean.

Finishes

Veneer, like all fine woods, should be finished to bring out its inherent and natural beauty. The finishing material should not be of such a nature that it detracts from the beauty of the wood. Nearly all fine wood is finished to a flat, satin, or non-glossy appearance.

The architect or designer usually specifies various types of finishing systems. It is important to use a recommended system rather than combining systems or products of different manufactures to “short-cut” the specifications. The recommended systems are as follows.

Synthetic Varnish System (Alkyd) – Apply one coat of clear sanding sealer according to the manufacturer’s directions. A brush or roller application is recommended. When dry, generally after three to four hours, sand with fine sandpaper and dust clean. Finish as desired with a flat varnish for a matte sheen, a satin finish for an eggshell sheen, or apply a second coat of the sanding sealer to obtain a semi-gloss sheen.

Poly-urethane Varnish Systems – Urethanes are highly resistant to abrasion, marring, detergents, grease, oil, water, and alcohol, and they produce a hard, tough film. This finish is not recommended for use over sanding sealer, lacquer, or shellac.

Do not use old shellac. Shellac has a typical “shelf life” of six months. After the shelf life has expired, most shellac will not dry.

Shellac and Varnish Systems – Do not use old shellac. Shellac has a typical “shelf life” of six months. After the shelf life has expired, most shellac will not dry.

Apply one coat of 4lb cut shellac reduced one part shellac with one part denatured alcohol as the sealer coat. Allow the shellac to dry thoroughly, sand with fine sandpaper, and dust clean. A finished coat of alkyd or synthetic varnish in the desired sheen may be applied.

Note: The use of paste wood filler on open grain woods such as Oak, Ash or Mahogany before the application of any of the above systems is optional. Filling uniforms the surface and is especially desirable on horizontal work areas.

Note: Spray application may be employed if the operator knows the techniques and equipment necessary to obtain satisfactory results with the above-suggested systems.

Charter Industries makes no warranties or guarantees regarding any finishing procedure.

Veneer Limited Guarantee

Purchaser should be aware that these products will perform satisfactorily provided they are applied in strict compliance with the manufacturers’ recommendations. Please refer to the suggested application instructions on this document, or contact Charter Industries to receive the proper written installation instructions.

Inspect the products before using them. The inspection of the product is the sole responsibility of the purchaser. Charter Industries is not responsible for any unseen or latent defects to the product not discovered upon initial inspection. Charter Industries is not liable to any party for any unusual, incidental, consequential, or punitive damages or claims of labor. Altering the product in any way from its original condition constitutes acceptance of the product by the purchaser. Charter Industries shall not be responsible for, refund nor replace the defective product after it has been processed into a different form, than originally sent by Charter Industries to the purchaser. Charter Industries’ mercantile agents, commercial salespeople, employees, and agents are not authorized to admit defects or claims arising from defects relating to any goods sold by the seller.

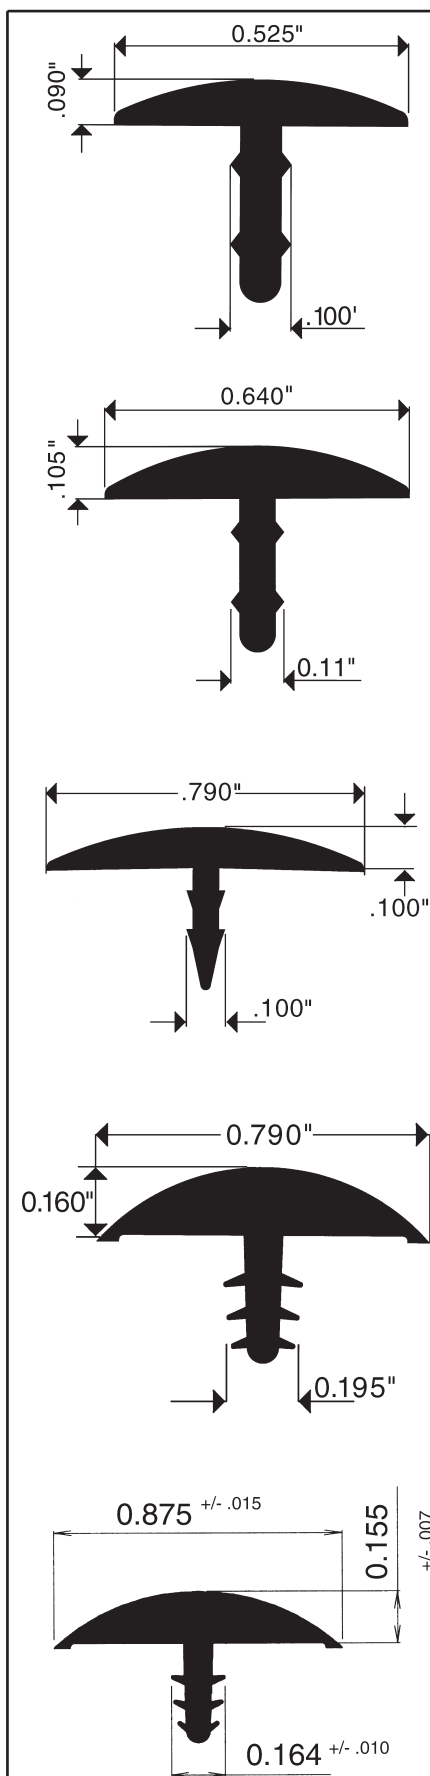

This product consists of natural wood veneer laminated to a backer material. Charter Industries shall warrant the bond of the wood veneer to the factory adhered backer from delamination for a period of no longer than one year, provided the installation instructions have been properly followed. No other claims will be considered due to but not limited to; variances in climate, application techniques, tool defect, chemical altering or the surface condition of the substrate. There are no warranties, expressed or implied, which extend beyond the written warranties contained herein.

If it is determined by the original manufacturer that the product does contain a defect, the limitation of the vendor/manufacturer liability shall be at the vendor’s/manufacturer’s discretion to replace the product or credit the purchase price paid. Charter Industries shall not be liable for consequential, indirect or incidental damages or for any amount in excess of the price of the products involved. No claims of labor or additional materials will be considered. Product authorized for return must be in their original condition, without stains, finish or altered in any way. Product authorized for return must be returned in its original or like packaging complete with an RGA form issued by Charter Industries. Upon return, only product that is deemed acceptable will be issued the appropriate rebate.

CREDIT AGREEMENT

I understand that by signing this credit application, I am stating that I am a legal agent of the above-mentioned company and that I have the authority to represent the company in this matter. Further, I hereby authorize Charter Industries to contact the three trade references, and inquire about the company's payment practices and other factors that may help Charter Industries access creditworthiness. I also understand that I am authorizing Charter Industries to access national, regional, or local databases to obtain any information that may assist in assessing credit risk. As part of this agreement, revoked checks are subject to a \$25 fee and outstanding balances past term are subject to additional 1.5% monthly finance charges. Should Charter Industries be forced to file a legal claim against the applicant and/or the undersigned for reason to recover the past due amount, it is the right of Charter Industries to add reasonable collection costs, legal costs and attorney fees to assigned balance due to time of collection and legal pursuit. As an inducement to grant credit, the undersigned warrants that the information submitted is true and correct.

Personal Guarantee

The undersigned personally and individually guarantee the payment of any outstanding balances and obligations of the named Applicant in this document due Charter Industries, and agree that I am personally obligated to perform all of the terms of and make all payments to Charter Industries required by the agreement of which this Application is a part. Absent written permission by Charter Industries this personal guarantee may not be revoked.

This application must be signed by an officer, partner, or proprietor of the firm to authorize opening of the account.

Authorized Signature Title Date

TERMS:

Our terms are net 30 days
